Issue 21 October 2015 **Public Version**

COMMUNITY NEWSLETTER

Swiss Robotics Industry Day

Within the framework of the NCCR Robotics programme, we are organising the first Swiss Robotics Industry Day on 04-Nov 2015 at the Swiss Tech Convention Center in Lausanne. Read more

A folding robot weighing 4 grams that crawls and jumps

Jamie Paik's lab, (RRL - EPFL) has come up with a folding, reconfigurable robot that is capable of crawling and jumping. Modelled on the inchworm, it represents a new paradigm in robotics. Read more

Two New Professors

We warmly welcome two new ETHZ Professors: Walter Karlen and Margarita Chli. They will be working in the Wearable Robotics Grand Challenge. NCCR Robotics is currently made up of 21 different research groups across Switzerland.

CONGRATULATIONS

Inaugural Lecture

David Atienza's inaugural lecture entitled "Designing embedded systems for the new era of computing" took place on 24th September at EPFL. Read more

New Assistant Professor

Marco Hutter (ASL - ETH Zurich) was appointed Assistant Professor in Robotics Systems at ETH Zurich. Read more

Stéphanie Lacour

Stéphanie Lacour was listed amongst the Robohub 25 Women in Robotics You Need to Know About -2015. Read more

Thesis Defense

Klas Kronander (LASA - EPFL) presented his thesis defense: "Control and Learning of Compliant Manipulation Skills" at EPFL on 4th September 2015.

Przemyslaw Kornatowski one of the "Innovators under 35"

Przemyslaw Kornatowski (LIS - EPFL) has been shortlisted in the Polish chapter of the Innovators under 35 competition for his work with robots for rescuing victims after disasters. Read more

INSIDE SWISS ROBOTICS

Swiss Robotics

Swiss Robotics is an expanding and successful SWISS NCCR Robotics initiative that provides Swiss startups with a unique opportunity to co-exhibit with NCCR Robotics at selected conferences and trade fairs. Discover some of these start-ups:

Insightness

Insightness develops visual positioning systems for mobile robots and smart glasses. These systems use event-based vision sensors that encode information in a highly efficient, brain-inspired way. Read more

III NCCR PRESS COVERAGE

Cybathlon practice session a success

28 teams, 54 staff members and 73 volunteers, helped to make the Cybathlon rehearsal event a success. Read more

GUESS WHO?

Can you guess who this NCCR professor is?

This professor's interest in engineering started when he was very young, he never liked to do things that were easy or that were planned for his age but enjoyed more complicated challenges. Read more

NEW MEMBERS

Davide Falanga (RPG - UZH)

Davide Falanga is a PhD student at the University of Zurich (UZH) in the Robotics and Perception Group. His research interests lie in the area of dynamical systems, control and trajectory planning for autonomous aerial vehicles.

Laurent Dejace (LSBI - EPFL)

Laurent Dejace is a PhD at the Swiss Federal Institute of Technology (EPFL). He is working on stretchable materials with tactile sensing capabilities used for wearable robotics applications.

Min Liu (INI - UZH / ETH Zurich)

Min Liu is a PhD student at ETH Zurich with a major in Electrical Engineering and machine vision. His research focuses on a miniaturised neuromorphic camera for mobile applications.

L DEPARTING MEMBERS

Jawad Nagi (IDSIA)

Jawad is in the process of submitting his thesis for defence in the upcoming months. He will then take up the position of research associate at the Luzern University of Applied Sciences and Arts.

SELECTED NCCR PUBLICATIONS *

*Selected publications include publications which have been made known to the <u>editor</u>. All members are kindly encouraged to inform the management team of new pulbications.

NCCR Robotics

The Swiss National Center of Competence in Robotics (NCCR Robotics) is a federally funded programme bringing together robotics laboratories from EPFL, ETH Zurich, University of Zurich and University of Lugano to work on wearable, rescue and educational robots.
